

EDUCATION

J.C. Bose University of Science and Technology, YMCA
Bachelor of Technology (B.Tech) in Computer Science

Aug 2023 – Aug 2027
Haryana, India

EXPERIENCE

Internshala

Sep 2025 – Oct 2025

Internshala Student Partner | Leadership, Networking, Communication

Remote

- Selected as an Internshala Student Partner to promote internship opportunities and skill-building programs to students.
- Organized student engagement activities and acted as a liaison between Internshala and the student community.
- Enhanced leadership, communication, and networking skills while guiding peers toward meaningful career opportunities.

International Institute of SDGs & Public Policy

May 2025 – Jul 2025

Web Development Intern | Tech: React, JavaScript, CSS3, APIs

Remote

- Developed responsive web applications focused on sustainable development goals, implementing best practices in modern web development.
- Collaborated with cross-functional teams to create user-friendly interfaces and deliver high-quality solutions.
- Implemented RESTful APIs and integrated third-party services to enhance application functionality.

Cyberent Cube

Mar 2024 – April 2025

Cybersecurity Intern | Tech: Kali Linux, Burp Suite, Nmap

Remote

- Conducted comprehensive penetration testing on web applications and network infrastructure using industry-standard tools.
- Performed vulnerability assessments and security auditing, identifying critical security risks and providing remediation strategies.
- Gained hands-on experience with network analysis using Wireshark and automated scanning tools like Nmap.

PROJECTS

HealthSaathi | React 19, FastAPI, Python, SQLite, Tailwind CSS, Groq API

- Architected a full-stack telemedicine platform with 4 core modules, building 20+ React components and 8+ FastAPI endpoints with less than 200ms response time.
- Engineered AI-powered medical chatbot using Groq API for real-time symptom analysis and dynamic payment module that generated UPI QR codes.
- Engineered 4+ FastAPI endpoints with Pydantic validation, JWT authentication, CORS middleware, and SMTP-based email notifications.
- Developed a responsive React frontend with Tailwind CSS, Framer Motion, Axios, and React Router for seamless cross-device user experience.

randnamepy | Python, pytest, PyPI

[Code](#)

- Developed and published randnamepy, a zero-dependency Python library for generating realistic names, usernames, and placeholder test data using only the standard library.
- Structured the package into modular components with pytest coverage, reaching [800+] downloads on PyPI.

VeeCall | FastAPI, WebRTC, WebSockets, React.js, Tailwind CSS

[Code](#)

- Architected a real-time video calling application with room-based communication, enabling users to create or join calls and exchange messages through an integrated in-call chat system.
- Implemented peer-to-peer audio/video streaming with WebRTC and built WebSocket-based signaling in FastAPI.
- Deployed the application on Railway and Render with production-oriented features

OTPFy | Python, Flask, SQLAlchemy, SMTP

[Code](#)

- Built a secure OTP-based authentication system with 3 core user workflows—registration, login, and OTP verification—adding an extra layer of access control.
- Built email verification system using SMTP protocol and managed user data with SQLAlchemy ORM.
- Implemented session management and token-based security for enhanced user authentication.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript, Python, SQL

Frontend Technologies: React.js, TailwindCSS, Bootstrap

Backend Technologies: Flask, FastAPI, REST APIs, Node.js, Express.js, bcrypt

Databases: MySQL, MongoDB

Cybersecurity Tools: Kali Linux, Penetration Testing

DevOps & Cloud: Git, GitHub, Heroku, Netlify, Vercel

Data Science: NumPy, Pandas, Matplotlib

Development Tools: Postman, Linux, VS Code, Cursor

Open Source: Published Python package on PyPI (randnamepy)

ACHIEVEMENTS & CERTIFICATIONS

- Built and deployed 15+ full-stack web applications demonstrating proficiency in modern web technologies.
- Published **"randnamepy"** an open-source Python package on PyPI with 800+ downloads for generating realistic test data.
